

48mm Omni Wheel

The 48mm omni wheel is an omni multi-directional wheel and it can either roll like a normal wheel or roll laterally using the wheels along its circumference. The omni wheel provides the ability to move in any direction without the need of a traditional swivel mount. Each wheel acts independently to improve control and allows you to rotate and move sideways in confined spaces. Meanwhile, these wheels allow moving forward/backwards and rotation without changing its orientation.

The 48mm omni wheels are available in double plate. The omni wheels have two single plates, and each plate with four rollers.

Benefits:

- Multidirectional movement
- Low maintenance
- Robust, durable and high impact
- Easier directional control and tracking
- Simple and stable mounting

Applications:

- Robotics
- Passive wheels
- conveyor systems
- Ball transfer table alternatives
- Conveyor transfers pipe rollers and other inverted application

The omni wheels are ideal for use as a floor wheel and robot wheel that fixing to be connected for Axle Centre of the LEGO mindstorms NXT and servo motor which according to your individual needs.

LEGO NXT

TT Motor

Servo Motor

General Axle

Usages:

The 48mm omni wheel is a conveyor skate wheel and these wheels make use of other applications, it allow for movement in multiple direction. The lightweight Omni-Wheel is ideal for carton flow storage and display racks.

Omni wheels can be used in power conveyor systems. You can mount them into different parts of your conveyor system, such as the conveyor itself or a transfer table.

Couplers:

The cross axle is a free accessories that provided for the 48mm omni wheels. Using cross axle, omni wheel is to be connected to LEGO mindstorms NXT and it can be easily joined to LEGO axle.

The axle centre is to be connected to the servo motor and TT motor. The axle centre is a free accessories and the front is to be connected to the servo motor and it is reverse is to be connected to the TT motor. Meanwhile, axle centre to be mounted with screw.

General axle can be attached to omni wheels. For dead (stationary) axle purposes. This general axle is custom designed for each application that will exactly suit for your individual needs. This coupler is available with diameter 3 to 6mm and It is to be mounted with screw.

Specifications:

Product Name	48mm Omn Wheel	Net Weight	40g
Part Number	14113	Load Capacity	2kg
Diameter	48mm	Support Coupler	General, LEGO, servo/TT
Thickness	25.1mm	Optional Coupler	General axle
Body Material	Nylon	General Axle Material	Aluminum
Plates Number	2	Optional General Axle Dia	3 ~ 6mm
Roller Material	TPR	Free Accessories	Axle centre, Cross axle
Rollers Quantity	8	Optional Accessories	General axle
Roller Diameter	13mm
